Peaks in time: Δt = 0 ms
Ch1
Ch2
Amplitude (a.u.)
10 Hz (bottom) and 20 Hz (top) components
20 Hz: shift = 0 cycle → Δφ = 0°, cos Δφ = +1.00
10 Hz: shift = 0 cycle → Δφ = 0°, cos Δφ = +1.00
Cross-channel phase
cos Δφ
cos(2π f Δt)
cos Δφ per 5 Hz bin
little peak energy
Peaks in time: Δt = 25 ms
10 Hz (bottom) and 20 Hz (top) components
20 Hz: shift = 0.5 cycle → Δφ = 180°, cos Δφ = -1.00
10 Hz: shift = 0.25 cycle → Δφ = 90°, cos Δφ = +0.00
Cross-channel phase: repeats every 1/Δt = 40 Hz
Peaks in time: Δt = 50 ms
10 Hz (bottom) and 20 Hz (top) components
20 Hz: shift = 1 cycle → Δφ = 1°, cos Δφ = +1.00
10 Hz: shift = 0.5 cycle → Δφ = 179°, cos Δφ = -1.00
Cross-channel phase: repeats every 1/Δt = 20 Hz
Time from candidate (s)
Frequency (Hz)
